

# Café Scientifique

Please **join us** for an interactive evening with a diverse panel of patients, family members and caregivers to help us answer the question:

## Together, how can we improve the care of critically ill patients?

In 2016, more than 10,000 people whose lives were in danger were admitted to an intensive care unit in Alberta. Apart from the care we provide, we conduct research to improve treatments so that these patients and their families do better.

*Are you interested in learning about patient, family member and caregiver experiences? Are you interested in contributing to a conversation about how to improve patient and family centered care in ICUs across Alberta? Come help us by sharing your thoughts and suggestions on how to improve the care of critically ill patients.*

This is a **FREE EVENT**; light refreshments will be served

**March 2, 2017 from 6:30pm to 8:30pm** at the **Yellowhead Brewery**  
(10229-105 Street, Edmonton, Alberta)
